Experience

Software Engineer Sr. **January 2022 – Present**
Lockheed Martin Space, Valley Forge, Pennsylvania

- Design and develop Python microservices, deploying with Kubernetes to bring scalability and stability.
- Maintain consistent code quality by utilizing Gitlab CI/CD pipelines to automate and accelerate time-consuming tasks such as building, testing, and publishing software, providing business value by saving time.
- Performed as Scrum master on several occasions for Agile-based project management and presented 2-week Sprint review presentations to stakeholders for over a year on an international project.
- Represented the team when travelling to customer sites, both in the U.S. (Ft Worth TX, Nellis AFB) and abroad (Helsinki Finland) to deploy and test software.

Code Instructor **July 2019 – 2025**
NuCamp, Philadelphia, Pennsylvania

- Instruct 5-10 students on the fundamentals of HTML, CSS, and JS or Bootstrap in a 4-to-5-week course.
- Aid students for 1-2 hours throughout the week.
- Provide 1-hour long lectures to students, followed up by a 3 hour workshop assignment.

Skills

- Python
- Java
- Gitlab CICD
- Kubernetes + Helm charts
- Microservices
- Docker
- OAuth 2.0
- Linux

Education

Bachelor of Science, Information Science and Technology **Dec. 2021**
The Pennsylvania State University **GPA: 3.97**

Associate of Science, Computer Science **June 2019**
The Pennsylvania Institute of Technology **GPA 3.97**

Accomplishments / Awards

- Salutatorian **2019**
